CERTIFIED INTERNATIONAL SUPPLY CHAIN MANAGER (CISM)

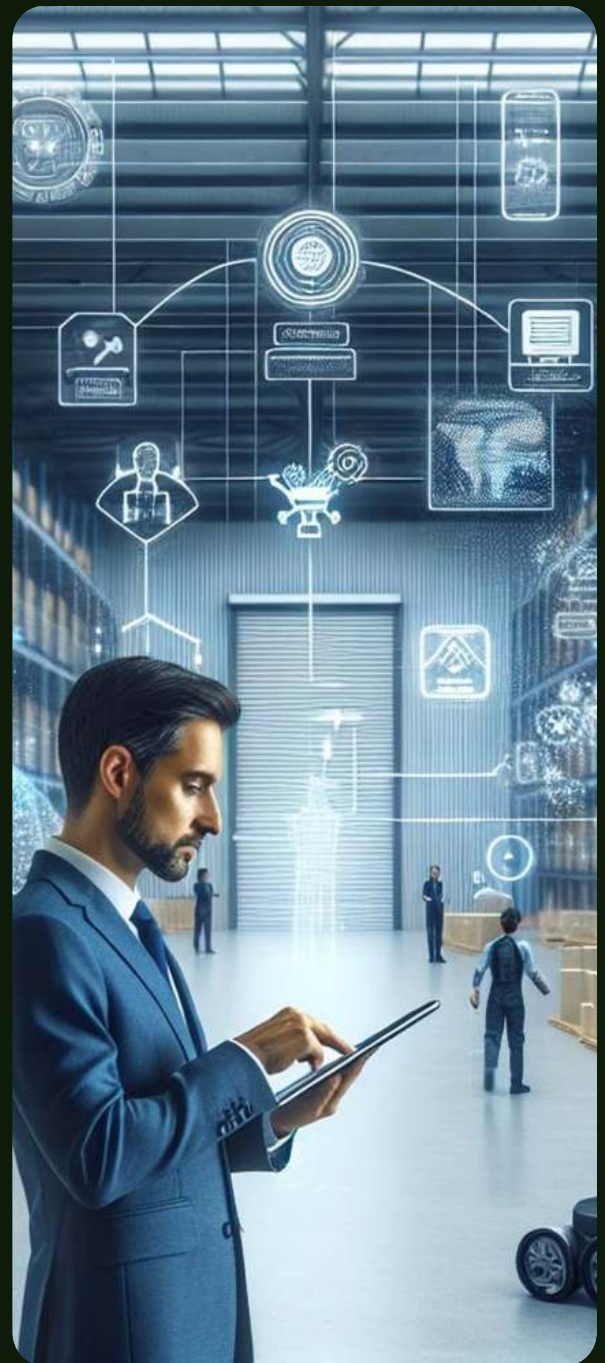

Face to Face/Virtual Instructor-Led Training

COURSE SUMMARY

In today's global business environment, organisations depend on skilled supply chain managers to optimise operations, strengthen supplier relationships, manage logistics, and drive sustainable business growth. Effective supply chain management plays a critical role in improving operational efficiency, reducing costs, and maintaining a competitive advantage across international markets.

The Certified International Supply Manager (CISM) programme is designed to provide participants with advanced knowledge and practical skills in strategic supply chain management. The course equips professionals with the expertise to manage global supply chain operations, supplier management, logistics, inventory optimisation, sustainability, collaboration, and emerging technologies while developing strategic decision-making capabilities.

Through practical learning and industry-focused frameworks, participants will develop the competencies required to manage complex supply chain networks, improve organisational performance, and create value in today's competitive global marketplace.

ENTRY QUALIFICATIONS

To enrol in this programme, participants should have:

- Proficiency in English.
- Relevant professional experience in procurement, logistics, supply chain, or related business functions.
- Basic understanding of supply chain management principles is recommended.
- Professionals seeking to advance into strategic supply chain management roles will benefit from this programme

Why Choose Certified International Supply Manager?

- Develop strategic expertise in global supply chain management.
- Build advanced knowledge in supplier management, logistics, and inventory optimisation.
- Learn sustainable supply chain practices and collaborative business strategies.
- Gain practical understanding of emerging technologies transforming supply chains.
