

DOCUMENT CONTROL TRAINING

Face to Face/Virtual Instructor-Led Training

COURSE SUMMARY

Effective document control is essential to maintaining quality, compliance, and operational efficiency across every stage of a project. From engineering and construction to healthcare, manufacturing, oil & gas, and government organisations, structured document management plays a vital role in ensuring information accuracy, traceability, and regulatory compliance.

The **Document Control Training Programme** equips participants with the practical knowledge and skills required to establish, implement, and manage document control systems in line with organisational, regulatory, and international quality standards.

The programme covers the complete document lifecycle—from document creation and approval to distribution, revision control, storage, retrieval, archiving, and disposal. Participants will also gain practical exposure to Electronic Document Management Systems (EDMS), document numbering, version control, document security, and project documentation processes.

Designed around industry best practices, this programme prepares professionals to manage documentation efficiently while supporting quality assurance, compliance, and project success.

ENTRY QUALIFICATIONS

To enrol in this programme:

- There are no formal entry requirements.
- No prior document control experience is required.
- Basic knowledge of Microsoft Excel is recommended.
- Suitable for both beginners and experienced professionals.

Why Choose Document Control Training?

- Develop practical skills in managing the complete document lifecycle.
- Learn industry best practices for document control and information management.
- Gain hands-on knowledge of Electronic Document Management Systems (EDMS).
- Strengthen compliance with organisational procedures and international quality standards.
- Build job-ready skills applicable across multiple industries and project environments.

Course Duration

- 12 Hours
(Including Practical Sessions)

LEARNER PROFILE

 This programme is ideal for:

- Document Control Professionals
- Engineering and Construction Professionals
- Quality Assurance Professionals
- Administrative Professionals
- Project Coordinators
- Information Management Professionals
- Professionals responsible for documentation and compliance

Build Precision
into Every
Project
Document.

COURSE CONTENT

The programme provides practical knowledge of modern document control systems and processes across the complete document lifecycle.

Core Topics Covered

- Roles and Responsibilities of a Document Controller
- Document Numbering Systems
- Document Filing Methods
- Benefits of Effective Document Control
- Document Distribution Procedures
- Document Registration
- Project Documentation Management
- Document Lifecycle Management
- Planning Document Control Activities
- Workload Planning and Calculation
- Task Allocation
- Project Handover Documentation
- Preparation of Document Control Procedures
- Implementation of Electronic Document Management Systems (EDMS)
- Reporting and Documentation Tracking
- Document Retrieval and Archiving
- Project Mail Management and User Preferences
- Collaboration with Project Teams
- Document Control Across Different Industries
- Practical Assignments
- Interactive Doubt-Clearing Sessions
- Introduction to Document Control Software

Together, these topics provide participants with a practical understanding of document control principles, industry standards, and modern documentation practices.

**From Documents to
Project Excellence.**

TRAINING OUTCOMES

Upon successful completion of the programme, participants will be able to:

- Understand the principles and importance of effective document control.
- Apply document control procedures throughout the document lifecycle.
- Create and maintain document registers, logs, and transmittals.
- Implement document numbering and coding systems.
- Manage document revisions and version control effectively.
- Review, approve, distribute, and archive controlled documents.
- Use Electronic Document Management Systems (EDMS) efficiently.
- Maintain document confidentiality, security, and controlled access.
- Support compliance with ISO standards and organisational procedures.
- Prepare documentation for internal and external quality audits.
- Improve efficiency in document tracking, retrieval, and information management.

CAREER OPPORTUNITIES

This programme prepares professionals for a range of documentation and information management roles, including:

- Document Controller
- Senior Document Controller
- Document Control Manager
- Records Manager
- Information Management Specialist
- Quality Systems Coordinator
- Project Controls Coordinator
- Compliance Documentation Manager
- Project Documentation Officer

WHY CHOOSE ENTREPÔT TRAINING INSTITUTE?

At Entrepôt Training Institute (ETI), we combine practical industry expertise with structured learning to prepare professionals for successful careers in document control, quality management, and project administration.

- **Expert Trainers** with extensive industry and project experience.
- **Comprehensive Course Coverage** aligned with current document control practices and industry standards.
- **Flexible Learning Options** through classroom and virtual instructor-led training.
- **Recorded Sessions via LMS** for convenient revision and self-paced learning.
- **Beyond-the-Book Learning** through practical assignments, real-world discussions, and project-based examples.
- **Industry-Focused Training** designed to build practical, workplace-ready skills.

Manage Information.
Maintain Compliance.
