

LOGISTICS AND SUPPLY CHAIN COURSE

LOGISTICS AND SUPPLY CHAIN COURSE

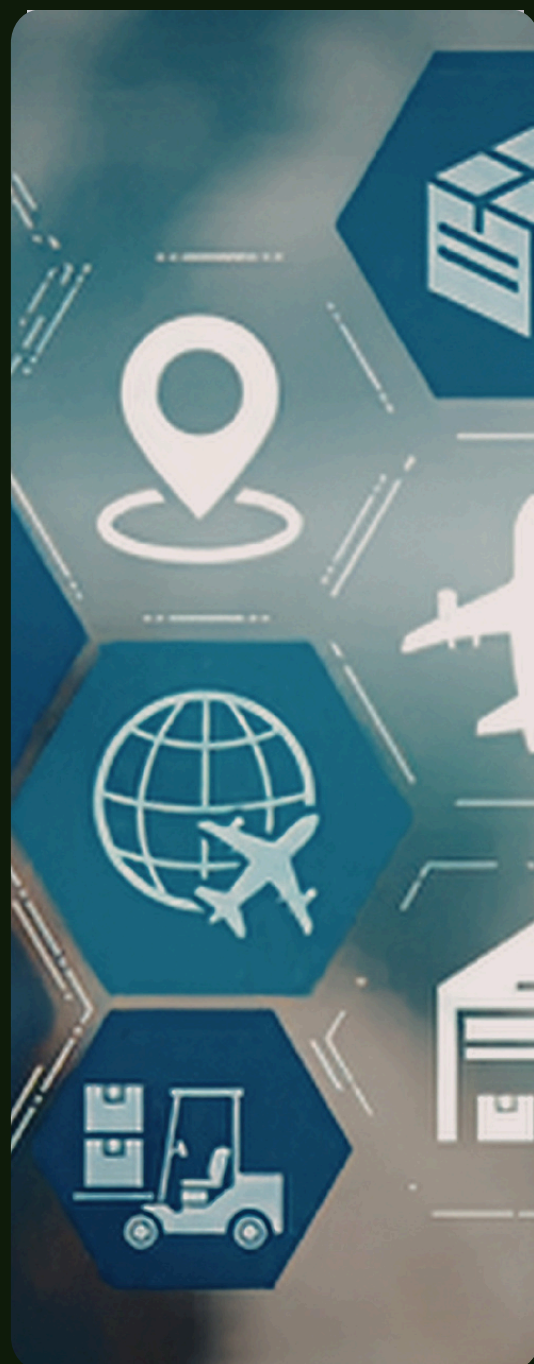

Face to Face or Virtual Training Mode

COURSE SUMMARY

Efficient logistics and supply chain management are critical to the success of modern businesses. From procurement and inventory management to warehousing, transportation, and distribution, organisations rely on skilled professionals to ensure products and services move seamlessly from suppliers to customers.

The Logistics & Supply Chain Management programme is designed to provide participants with the practical knowledge and industry-relevant skills required to manage end-to-end supply chain operations. The course covers logistics planning, procurement, inventory control, warehousing, transportation, distribution, freight forwarding, and supply chain optimisation.

Through practical learning and real-world business scenarios, participants will develop the expertise to improve operational efficiency, reduce costs, manage risks, and enhance customer satisfaction across today's global supply chains.

ENTRY QUALIFICATIONS

To enrol in this programme, participants should have:

- No prior logistics or supply chain experience is required.
- The programme is suitable for beginners and experienced professionals.
- An interest in logistics, procurement, operations, or supply chain management is beneficial.

Why Choose Logistics and Supply Chain Management?

- Build a strong foundation in modern logistics and supply chain management.
- Learn practical techniques for procurement, warehousing, and inventory control.
- Understand international logistics, freight forwarding, and transportation management.
- Develop skills to improve operational efficiency and business performance.
- Gain practical knowledge aligned with current industry practices.
