

PRACTICAL ARTIFICIAL INTELLIGENCE FOR WORK AND BUSINESS

AI GENERALIST

Learn. Apply. Automate. Create.

Build practical AI skills for research, content, analysis, productivity and real-world decision-making.

24 HOURS · FACE-TO-FACE / VIRTUAL

PROGRAMME OVERVIEW

COURSE SUMMARY

This course equips learners to use Artificial Intelligence effectively across business, education, marketing, software, customer service and everyday work.

The programme combines AI fundamentals with prompt engineering, generative tools, automation, responsible use and practical industry applications.

THE PROGRAMME AT A GLANCE

- 11 practical modules
- 24 guided learning hours
- No prior AI or programming experience required
- Face-to-face and virtual instructor-led options
- Applied exercises throughout

BUILT FOR PEOPLE WHO WANT TO APPLY AI

LEARNER PROFILE

- Students and fresh graduates preparing for AI-enabled careers
- Working professionals improving productivity
- Entrepreneurs and business owners adopting AI solutions
- Educators integrating AI into teaching and learning
- Marketing, sales, HR, recruitment and operations teams
- Freelancers and consultants expanding their services
- Anyone interested in applying AI responsibly

ENTRY QUALIFICATIONS

- Basic computer and internet skills
- Familiarity with common office tools
- No prior programming or AI experience required

COURSE CONTENT

MODULE 01

Introduction to Artificial Intelligence

Understand core AI concepts and terminology.

- History and types of AI
- AI, machine learning, deep learning and generative AI
- The AI ecosystem, current trends and future direction

PRACTICAL

Explore popular AI platforms and create your first AI-generated response.

MODULE 02

Generative AI Fundamentals

Understand how generative AI and large language models work.

- LLMs, tokens and context windows
- Hallucinations and output quality
- Model strengths, limitations and reasoning

PRACTICAL

Compare multiple AI models and analyse generated content.

COURSE CONTENT

MODULE 03

Prompt Engineering

Write stronger prompts and improve AI response quality.

- Prompt structure and templates
- Zero-shot and few-shot prompting
- Role prompting and reasoning concepts

PRACTICAL

Design and optimise prompts for business scenarios.

MODULE 04

AI Productivity Tools

Use AI to accelerate everyday professional work.

- Chat, search and writing assistants
- Meeting, presentation and note-taking tools
- Professional emails, reports and document summaries

PRACTICAL

Create a presentation, summarise a document and draft workplace content.

COURSE CONTENT

MODULE 05

AI for Content Creation

Create multi-format content efficiently and responsibly.

- Blogs, social posts and copywriting
- AI image, video and audio generation
- Storytelling and campaign development

PRACTICAL

Create a complete AI-assisted content campaign.

MODULE 06

AI for Business

Apply AI across core business functions.

- Marketing automation and sales support
- Customer service and HR recruitment
- Finance applications and business intelligence

PRACTICAL

Develop an AI-assisted business workflow.

COURSE CONTENT

MODULE 07

AI for Data Analysis

Turn business data into accessible insight.

- Data interpretation and spreadsheet automation
- Dashboard generation and data visualisation
- Predictive insights

PRACTICAL

Analyse business data using AI.

MODULE 08

AI Automation

Connect AI to repeatable workflows.

- Workflow automation and AI agents
- No-code automation and API concepts
- Productivity workflows

PRACTICAL

Build an automated workflow integrating AI.

COURSE CONTENT

MODULE 09

AI Ethics, Privacy & Security

Use AI responsibly and manage risk.

- Responsible AI, bias and governance
- Copyright and privacy regulations
- Security risks and deepfakes

PRACTICAL

Evaluate AI content for ethical and legal considerations.

MODULE 10

AI Across Industries

Explore practical AI applications across sectors.

- Healthcare, education and finance
- Manufacturing, retail, media and legal
- Government, logistics and real estate

PRACTICAL

Solve an industry-specific AI use case.

COURSE CONTENT

MODULE 11

Emerging AI Trends

Understand where AI is heading next.

- AI agents and multimodal AI
- Robotics and autonomous systems
- AI in cybersecurity and future careers

PRACTICAL

Research and present an emerging AI technology.

FUTURE-READY CAPABILITY

The course closes by connecting emerging technology to real roles, practical opportunities and the learner's own professional context.

**Understand the shift.
Be ready to lead it.**

LEARNING OUTCOMES

FROM AI USER TO AI-ENABLED PROFESSIONAL

By the end of the course, learners will be able to:

- Use AI for research, writing, analysis and content creation
- Design effective prompts for accurate, useful outputs
- Evaluate AI content for quality, accuracy and bias
- Automate routine tasks using AI-powered workflows
- Apply AI in business, education, marketing and workplace scenarios
- Collaborate with AI to improve productivity and decisions
- Develop AI-assisted projects for real-world challenges

PRACTICAL · RESPONSIBLE · FUTURE-READY

THE ETI ADVANTAGE

WHY CHOOSE ENTREPÔT?

Industry-aligned curriculum and expert faculty create a transformative learning experience with practical skills at its core.

- KHDA-Dubai approved and aligned with international certifying organisations
- Flexible online, offline and hybrid class options
- Experienced and certified industry trainers
- Convocations, webinars, seminars and career counselling
- CV, interview preparation, grooming and other value-adds
- Special offers, instalment plans and Student's Club membership
- 200+ approved, job-oriented courses

Gateway to excellence.

ENROLMENT AND COURSE INFORMATION

BUILD YOUR AI ADVANTAGE.

Develop the practical confidence to use AI intelligently, responsibly and productively in today's workplace.
