

VIRTUAL ASSET AML TRAINING

COMPLIANCE FOR VIRTUAL ASSET BUSINESSES

A focused 6-hour programme covering AML controls across customers, wallets, blockchain transactions, sanctions risk, Travel Rule reporting and inspection readiness.

6 HOURS • 1 DAY

Practical, sector-focused compliance training

Understand the customer. Understand the wallet.

The first half of the programme builds the foundation for KYC, wallet due diligence and blockchain transaction monitoring.

1

UAE Virtual Asset AML Framework

- Core AML compliance framework for virtual asset business activity
- Translate obligations into a structured compliance approach

2

Customer KYC & Wallet Due Diligence

- Customer KYC review
- Wallet due diligence
- Link customer information with wallet activity

3

Blockchain Transaction Monitoring

- Review blockchain transaction patterns
- Identify unusual movement and transaction behaviour
- Escalate activity that warrants deeper review

Wallet risk, reporting & inspection readiness

Turn blockchain activity into a structured compliance review.

4 Wallet, Counterparty & Sanctions Risk

- Assess wallet and counterparty risk
- Identify high-risk and sanctioned-address exposure
- Apply sanctions-focused review

5 Travel Rule & STR/SAR Reporting

- Travel Rule awareness
- STR/SAR reporting workflow
- Document and escalate suspicious activity

6 Regulatory Inspection Readiness

- Organise compliance evidence
- Prepare records for regulatory review
- Demonstrate a consistent compliance process

KEY RED FLAGS

- Mixers
- High-risk wallets
- Sanctioned addresses
- Rapid chain hopping
- Multiple wallets
- Unexplained crypto transfers
- Unusual fiat-to-crypto activity

PRACTICAL EXERCISE

Review a virtual-asset transaction and identify wallet, customer and sanctions risks.
